Account Manager Notes

Happy Client has maintained strong approval rates throughout H1 2025, consistently above the platform average of 97.3%. Their chargeback rate of 0.15% is well within the acceptable threshold of 0.5%. Refund volume increased slightly in Q2, primarily attributed to a spring promotional return window extension. Account manager recommends reviewing payout schedule — the client is currently on T+2 and may benefit from the Instant Payout option given their consistent positive balance. No compliance flags raised in this period. Renewal of Scale plan due 1 September 2025.
