

Super Payments — FAQ

Frequently Asked Questions for Merchants & Shoppers

General

Q: What is Super Payments?

A: Super Payments is an e-commerce payment platform that helps online businesses accept payments from customers worldwide. We provide checkout, fraud protection, payouts, and analytics tools in one integrated platform.

Q: Who can use Super Payments?

A: Any business selling online can use Super Payments — from independent sellers and startups to established e-commerce brands. We support merchants in 38 countries. Certain regulated industries (e.g. gambling, firearms) require additional verification.

Q: Is Super Payments a bank?

A: No. Super Payments is a payment facilitator and technology provider, not a bank. We partner with licensed banking and card-network partners to process and settle funds.

Getting Started

Q: How do I sign up?

A: Visit superpayments.io and click 'Get Started'. You'll complete a short onboarding form, verify your identity, and connect a bank account. Most accounts are approved within one business day.

Q: What documents do I need to provide?

A: Individual sellers need a government-issued ID and bank account details. Businesses also need their company registration number, VAT/tax ID (where applicable), and details of business ownership.

Q: How long does account approval take?

A: Standard accounts are reviewed within 1 business day. High-volume or higher-risk categories may require up to 5 business days for manual review. You will receive an email notification at each step.

Payments & Checkout

Q: Which payment methods does Super Payments support?

A: We support Visa, Mastercard, American Express, Discover, Apple Pay, Google Pay, PayPal, Klarna (Buy Now Pay Later), iDEAL, Bancontact, SEPA Direct Debit, and 30+ additional local payment methods depending on your region.

Q: In which currencies can I accept payments?

A: You can accept payments in 60+ currencies. Settlement is available in 18 major currencies. Currency conversion is handled automatically at competitive mid-market rates.

Q: Is Super Payments PCI compliant?

A: Yes. Super Payments is certified PCI DSS Level 1 — the highest level of compliance. When you use SuperCheckout or our hosted payment fields, your customers' card data never touches your servers, reducing your PCI scope to the minimal SAQ-A level.

Q: Can I customise the checkout experience?

A: Yes. SuperCheckout supports full CSS theming, custom logo, and localised language display. Developers can use SuperGateway's headless API for fully custom checkout UI.

Fees & Pricing

Q: What are the transaction fees?

A: Our Starter plan charges 2.9% + \$0.30 per successful transaction with no monthly fee. Growth and Scale plans offer lower per-transaction rates for a monthly subscription. See our Pricing page for the full breakdown.

Q: Are there any hidden fees?

A: No. We do not charge setup fees, monthly minimums on the Starter plan, or PCI compliance fees. Chargebacks incur a \$15 fee per dispute, which is refunded if you win the dispute.

Q: Do you offer volume discounts?

A: Yes. Volume pricing is available for merchants processing over \$50K/month on our Growth plan, and custom enterprise pricing is available above \$500K/month. Contact our sales team at sales@superpayments.io.

Payouts & Settlement

Q: When will I receive my funds?

A: By default, settlements are paid out on a T+2 schedule (2 business days after the transaction). Instant Payout is available for eligible merchants on Growth and Scale plans for a 1% fee, with funds arriving within minutes.

Q: Can I change my payout schedule?

A: Yes. You can set daily, weekly, or monthly payout schedules from the SuperDashboard. Custom schedules are available to Enterprise merchants.

Q: What bank accounts are supported?

A: We support bank accounts in 35 countries. We support USD, EUR, GBP, CAD, AUD, and 13 additional settlement currencies. ACH, SEPA, and SWIFT transfers are all supported depending on your country.

Disputes & Chargebacks

Q: What happens if a customer disputes a charge?

A: You will be notified by email and in-dash when a dispute is filed. You have 7 calendar days to respond with evidence. SuperProtect provides automated evidence compilation to help you win disputes.

Q: Is there a chargeback fee?

A: Yes, a \$15 non-refundable dispute fee applies per chargeback. If you win the dispute, the \$15 fee is refunded to you. The disputed transaction amount is temporarily held until resolution.

Q: How do I reduce chargebacks?

A: Enable SuperProtect fraud scoring, use clear billing descriptors (your store name will appear on bank statements), respond promptly to customer inquiries, and provide accurate delivery tracking information.

Technical & Support

Q: Do you offer an API?

A: Yes. SuperGateway provides a RESTful API with SDKs for JavaScript, Python, PHP, Ruby, Java, Go, and .NET. Full documentation is at docs.superpayments.io.

Q: Which e-commerce platforms do you integrate with?

A: We offer native plugins for Shopify, WooCommerce, Magento 2, BigCommerce, PrestaShop, and Wix. Custom integrations can be built using our API.

Q: How do I contact support?

A: Live chat and email support are available 24/7 via the SuperDashboard. Phone support is available to Scale and Enterprise customers. You can also reach us at support@superpayments.io or visit our Help Center at help.superpayments.io.
